

## Health Concerns Prompt Software Give-a-way

*Classes and software for those who wish to start a business in support of the body's own self-healing potential*

*SoundHealth News - December 31, 2012* - In an attempt to provide alternatives to the ever increasing restrictions placed on Health Care and Health Freedom, a small, federally registered non-profit biotech company, Sound Health, has organized a series of workshops designed to address some of the urgent health care needs of our US population in general; and for people who have expressed a desire to help teach and support the ideas of SELF HEALTH.

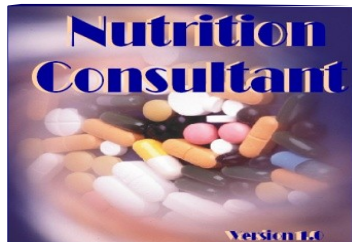

No one needs to explain to us that our Health Care system is in crisis. Thousands of people experience it every day and there will be more misdiagnosis, rationed care and death if the bungling continues. Three reasons have been provided as potential causes for this predicament. Health Care is more about \$\$ than health, mandated "Standards of Care" are not addressing individual needs and a great many health-care providers are abandoning their practices because of rising costs and government interference.

Six, easy-to-use software programs are being offered so that individualized, computer reports can be created in just a few minutes. After each live, online, interactive class, each session will be posted on YouTube. Sound Health is attempting to help people address what has been identified as the most prevalent and stressful health issues:

**nanoVoice Personality Profiler** – allows a person to determine intention and personality traits hidden within the words as people speak. – **BECAUSE YOU HAVE A RIGHT TO KNOW** the intentions and truthfulness of our leaders, your critics and those who attempt to manipulate you. It goes beyond The Secret as it reveals your authentic self. **Available now** - two hour video class from:

www.nanoVoice.org – SoundHealthOptions.com

**Nutritional Consultant** - Because our food is being tainted, poisoned, denatured and irradiated; and they refuse to allow us to know which foods have been adulterated. They = BigGovt, BigPharma BigFarma, Insurance Companies & HMO's, BigMoney, and BigFed – "They" = Any person or organization who puts their own need for power and money in front of the needs of THE PEOPLE.

**Post-Traumatic Stress Disorder (PTSD)** - Because our soldiers are being ignored, over medicated, neglected and warehoused in forgotten, underfunded and understaffed facilities.

We have identified eight nutrients consistent with PTSD and nine (9) protein markers for TBI. You can help by bringing this information to your community.

Radiation damage to cells during the next few years, decades will have devastating effects on health.

**Radiation Exposure/Rescue** - Because we have been lied to, the facts and dangers moderated, the regulations skewed. A recent study published in the December 2012 edition of the International Journal of Health Services states that over 14,000 deaths can be directly contributed to radiation exposure from Fukushima.

Radiation is destroying our cells setting us up for incredible health problems. The evidence shows that

“A foolish faith in authority is the worst enemy of Truth.” ---Albert Einstein

**Parkinson's Disease** (and other cell signaling stress) has become epidemic. GMO's foods are taking an incredible toll on our bodies ability to cellularly communicate.

Parkinson's is just a catch-all diagnosis for a myriad of diseases created by our lack of attention to what is really going on: lymes, tetanus, allergies, inflammation, lack of B5...

**Countervailing the Season** – Antidotes for flu's, immunizations and threatened pandemics. The evidence supports the report that our government has allowed BigParma to use us as Guinea pigs for Profit.

BioAcoustically Speaking, plans to create infertility are being implemented through Gardasil vaccinations, threats and fear.

These six software programs are being made available, on a limited basis, to the public so that a network of people offering HEALTH for THE PEOPLE by THE PEOPLE can be established. Asked why the Sound Health Institute is providing this to the public, Director Sharry Edwards replied, “There can be no change unless people can see options and hope for a better world. We want to provide solutions to a nurturing society that will allow people to use this free software and education to set-up community centers where people can be evaluated and informed about the health issues facing all of us. Without attention to our physiological and safety needs, we cannot hope to grow as a People, as a Nation, as a Universe united.”

“People ask”, Edwards continues, “what we do here at the Sound Health Research Center and that's a hard question to answer because the answer is hard to believe. We have found the fundamental pattern of the body's self-healing potential. Through frequency and its mathematical matrix of the brain and voice, we can support optimal form and function, reverse disease, predict health issues, accelerate healing and delve inside the body and mind using vocal

analysis. We have the evidence and the supportive outcomes. Now we need to wait for technology to catch up with us.”

“And so we provide these very special softwares to the public for free in support of them taking the information to their communities and spreading the word that we know will change us all and be our future.”

Other public class will be on-going in 2012 and posted on YouTube: BioDiet (real reasons behind weight mismanagement), BioHazzards (all about chemtrails pollution), PreVac (how to protect yourself before and after forced immunizations), Allergy Assessment (discover your individual sensitivities to foods and other substances). There are over fifty (50) softwares that will be shared to allow people to discover for themselves if they want to choose Health Freedom and dominion over their own bodies.

Participants will need a microphone (\$20+) and the ability to download software. Doable with Macs but requires partitioning the hard drive. All results are expressed in terms of Frequency Equivalents as management reports.
